In the western fjords

You can find very intimate, delicate and thrilling fishing at [Laugardalsa](#), [Hvannadalsa](#) and [Langadalsa rivers](#). Laugadalsa had increase of 116 salmon compared to previous year. When you think that there is only 2-3 rods, the total of 500 salmon in 2009 means that this river is nothing but a hidden gem.

Hvannadalsa and Langadalsa are often fished together. Over 500 salmon between them on 3-4 rods in 2009 meant that it was one of the best seasons ever. The two rivers share the same estuary where can be found also some good sea trout fishing.
